Supplemental Box

In case the space in any of the preceding boxes is not sufficient.
Continuation of Box V:

The invention of claim 1 does not appear to involve an inventive step based on documents 1 and 8, documents 2 and 8, documents 3 and 8, or documents 4 and 8 cited in the ISR. More specifically, the inventions indicated in documents 1 through 4 wherein a plurality of memory cards attached to a housing such as a card tray and adapter are configured so as to write /read data simultaneously to a plurality of memory cards as indicated in document 8 could be easily conceived of by a party skilled in the art.

The invention of claim 2 does not appear to involve an inventive step based on documents 1 and 8, documents 2 and 8, or documents 3 and 8 cited in the ISR.

The invention of claim 3 does not appear to involve an inventive step based on documents 1 and 8, or documents 2 and 8 cited in the ISR.

The inventions of claims 7-9 do not appear to involve an inventive step based on documents 3 and 8 cited in the ISR. Because the size of the memory card adapter of document 3 conforms to PCMCIA, it is same as the card size described in claims 7-9.

The inventions of claims 7-9 do not appear to involve an inventive step based on documents 1, 5 and 8, documents 2, 5 and 8, or documents 4, 5 and 8 cited in the ISR. Configuring the housing size of document 1, 2 or 4 to a size as stipulated in document 5, and adopting technology of writing/reading data simultaneously to a plurality of memory cards of document 8 would be easy for a party skilled in the art.

The invention of claim 10 does not appear to involve an inventive step based on documents 1, 6 and 8, documents 2, 6 and 8, documents 3, 6 and 8, documents 4, 6 and 8, documents 1, 7, and 8, documents 2, 7 and 8, document 3, 7 and 8, or documents 4, 7 and 8 cited in the ISR. Adopting an SD memory card as stipulated in document 6 or 7 in a card of document 1, 2, 3 or 4 and adopting technology of writing/reading simultaneously to a plurality of memory cards of document 8 would be easy for a party skilled in the art.

The invention of claim 14 does not appear to involve an inventive step based on documents 1, 5 and 8, documents 2, 5 and 8, or documents 3, 5 and 8 cited in the ISR. Adopting a write protect switch disclosed in document 5 to a housing of document 1, 2 or 3, and adopting technology of writing/reading data simultaneously to a plurality of memory cards of document 8 would be easy for a party skilled in the art.

The inventions relating to claims 4-6 and 11-13 are not described in any of the documents cited in the ISR; nor are they obvious to a party skilled in the art.
